Goals

Work together

One report (countywide) by community

Agree on process*

Previous Assessments

By organization

By priority area

Agree on priority areas*

Timeline:

Next Steps:

Next Meeting(s):

**Range Healthcare – Community Health Assessment
Northeast Service Cooperative
January 30th, 2017
1:00 p.m. – 3:00 p.m.**

In Attendance: Steve Giorgi, Ray Jobe, Kim Stokes, Jim Gangl, Steve Leslie, Cheryl Bisping and Jean Larson

On the phone: Jody Martin, Louise Anderson, Michael Meller and Kelly Stauber

Who should be invited to be a part of this meeting?

AEOA – Sara emailed Lorrie Janatopolous to see if she had any suggestions.

Tribes – Jim is working with the tribes to who would represent the tribes, at this point they are still undecided but they would like to participate.

Project Care

Either the regional or local coordinator from SHIP

Also, discussion on inviting daycare providers, senior centers, schools and/or colleges.

Health organizations are required to complete a Community Health Needs Assessment. An implementation plan is also a requirement when completing the assessment. How often they have to complete an assessment depends on the organization. The counties assessment would have to be more detailed.

Hospitals are on a 3-year cycle

Other providers are on a 4-year cycle

Public Health are on a 5-year cycle

***Public health will be going on a 3-year cycle*

Last year, health organizations in Duluth came together for the first time to collaboratively complete a Community Health Assessment. They have created Bridging Health Duluth.

<http://www.slhduluth.com/Media-Center/News-and-Awards/2016/Organizations-Partner-to-Form-Bridging-Health-Du.aspx>

Goal:

To get everyone to work together on the same thing, creating one report for the entire county. Have a separate section for each community, this will give each community the option of being more specific. The tribes would also have a section to include a report of their needs. Agree on a process for creating the assessment.

How information is compiled (May vary depending on the hospital): Conduct focus groups, send out surveys, county data and community comments. There are guidelines in place.

Process Option:

MAPP (Mobilizing for Action through Planning and Partnerships), 6 step process – this is a great tool. It can be modified to fit your needs. Minnesota Department of Health is sending out other process options.

How can we make all the data useful to communities?

Collect all the data and put it onto one site. Additional information can be added and would be available to everyone.

Priority Areas:

Looking at past assessments, 9 priority areas have been determined between 8 health organizations. Can we narrow the scope and possibly consolidate priorities if possible? The original list was:

- Mental Health
- Substance Use/Abuse
- Obesity
- Socioeconomic Disparities
- Cancer
- Heart Disease
- Healthcare Access
- Adverse Childhood Experiences
- Healthy Lifestyles

It was decided that the main items would be the following: Mental Health as well as Adverse Childhood Experiences, Substance Use/Abuse and Healthy Lifestyles and Obesity Prevention. Socioeconomic Disparities would act as an umbrella.

There will also be a Mental Health Assessment taking place in all of Region III (Northeastern MN, 6 or 7 Counties and 3 Tribes) Led by Lynn Goerdt (UWS)

Timeline:

Gather data and evaluate what we get back. Send the information out to the facilities and communities for approval. Identify with each community if they would prefer focus groups or surveys. Decide what will be presented to these groups or questions that will be asked. Which areas should be focused on? Would it be based on population?

Possibility of having hospitals come and present their assessment information from past years. Jim has copies of all past assessments.

Jim will be creating a time table for the year.
Next Meeting: Late February – Specific Date TBD

Steps in the Mobilizing for Action through Planning and Partnerships (MAPP) Process:

Step 1: Organize for Success/ Partnership Development

- Organize leaders in the community to prepare to implement MAPP.
- Understand why MAPP is needed.
- Outline process.
- Identify resources.

Step 2: Visioning

Determine what you want the community to look like.
Ask "what would we like our community to look like in 10 years?"

Complete Four MAPP Assessments: List the challenges and opportunities from each of the four assessments .

Step 3: Community Health Status Assessment (CHSA)

- Gather and analyze information on priority community health, quality of life issues, and risk factors (data)

How healthy are our residents?

What does the health status of our community look like?

Step 3: Community Themes & Strengths Assessment (CTSA)

- Understanding the issues residents feel are important (surveys, focus groups, asset mapping)

What is important to our community?

How is the quality of life perceived in our community?

Step 3: Local Public Health System Assessment (LPHSA)

- A comprehensive assessment that includes all the organizations and entities that contribute to the delivery of public health.

What are the activities, competencies, and capacities of our local public health system?

How are the 10 Essential Public Health Services being provided in our community?

Step 3: Forces of Change Assessment (FOCA)

Legislation, technology, trends, changes, etc. that affect how the community and public health system operates

What is occurring or might occur that affects the health of our community or the public health system?

What specific threats or opportunities are generated by these occurrences?

Step 4: Identify Strategic Issues

- Use the findings from the four assessments to determine what the critical issues are.
- Determine what specific issues need to be addressed to achieve the vision.

Step 5: Formulate Goals and Strategies

- Develop goals and strategies for attaining the vision, addressing the strategic issues identified in the prior stage.
- Strategies are the direction (or means) of obtaining our goals.

Step 6: Action Cycle

- Plan to:
- Act
 - Implement
 - Evaluate
